## Now KOOLGLIDE Technology for Hard Surfaces

### Introducing – the Instafast System

Now, with the Instafast System from KOOLGLIDE, unsightly face nailing can be eliminated and tedious board replacement is made easy. Just put the board in place over the KOOLGLIDE Utility Tape. Then use the KOOLGLIDE PRO-W to activate the tape right through the board. This system uses patented Sinch® Technology to remotely activate a specially designed tape.

It's safe, fast, easy and strong. If you make a mistake just reverse the bond and redo. And, it works on carpet too.

*Lab tests show that the bond made with the Instafast system from KOOLGLIDE is more than three times stronger than with a finish nail.*

#### KOOLGLIDE PRO-W Applications:

**Starter and finish rows without face nailing** – For many hard wood fastening jobs, face nailing is the only answer. But face nailing is visible from the surface and requires matching and filling. With the KOOLGLIDE, simply put the boards in place and hit the power button.

**Board replacement** – The trouble with conventional methods of board replacement is that once you have the board in place, you have to carefully remove it. This is difficult and sometimes damages the board. With KOOLGLIDE you put the tape behind the board. Then when the board fits perfectly, activate the tool.

**Decorative tile** – The KOOLGLIDE with utility tape is great for decorative tile applications such as base and back splash. Remember, the adhesive on the utility tape is non-structural adhesive and should be used only where the tile is supported.

#### Utility Tape

Item # KGT 350UT

- For hardwood, tile and composite
- 3 1/2' wide
- 66' roll
- Installation and board replacement

#### KOOLGLIDE PRO-W

Item # KG200W

- 6 lbs.
- Activates all Koolglide tapes
- 3/4" reach

## KOOLGLIDE ADVANTAGES

**Eliminates face nailing.** KOOLGLIDE installation of the starter and finish rows gives you a smooth, attractive surface. No nail holes to putty. Also, it's much easier than face nailing on concrete.

**Easy board replacement.** Removing and gluing a perfectly fitting board is one of the hardest tasks in board replacement. With KOOLGLIDE, once the board fits, just activate.

**Easy to use.** The KOOLGLIDE System is microprocessor controlled so all the operator needs to do is place the tool over the tape and push the button.

**Easy repairs.** With hardwood installation,

reactivating tape is a lot easier than pulling out nails. Also works on tile and laminate.

**Safe.** The Sinch® technology operating is low frequency and very safe to use.

**Clean.** With KOOLGLIDE the tool and the tape never touch. No messy glue.

**Carpet Seaming.** The PRO-W also doubles as a carpet seaming tool.
