

Dear KOOLGLIDE,

We are a residential and commercial flooring installation company. That's what we do. Sure, we can provide product if necessary, but our goal is to be the best installation company that we can. We began adopting the KOOLGLIDE System in late 2005 and I can say, without hesitation, that this tool has helped to make us a better company. It took some time to convince our installers to switch, but once they gave the KOOLGLIDE a fair chance, they wouldn't even consider going back.

The results have saved us both time and money. We have had an 80% reduction in seam-peaking claims. By not having to take the time to go back to trim and rework seams our installers are able to be more productive day in and day out. The KOOLGLIDE has also been a "greener" alternative for us compared to the traditional hot-melt iron. Occasionally, we get a customer with high sensitivity to allergens or toxins and a hot-melt iron can aggravate their symptoms. The KOOLGLIDE has virtually eliminated this phone call because it doesn't release these toxins.

Thanks KOOLGLIDE,

Glen Keller
